REQUEST FOR CORRECTED FILING RECEIPT

Dear Sir:

The Filing Receipt for the above-identified application issued with the incorrect city of residence for applicant and power of attorney. The Applicant hereby requests that a corrected Filing Receipt be issued in the above-identified patent application. The Filing Receipt, a copy of which is attached hereto, should be corrected as follows:

City of Residence of Inventor should read as follows:
--Pienzenau, GERMANY--

Power of Attorney should read as follows:
--Russell D. Culbertson - 32124--

Enclosed with this request is a copy of the first page of the published PCT showing the Applicant's correct city of residence for the application.

Applicant additionally requests that all pertinent Patent and Trademark Office records relating to the application be changed to reflect the correction.

Respectfully submitted,
The Culbertson Group, P.C.

Date: 19 Dec 2005

FILING RECEIPT

OC000000017408948

Date Mailed: 11/07/2005

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER; FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

(54) Title: CLAMPING AND/OR BRAKE DEVICE

(54) Bezeichnung: KLEMM-UND/ODER BREMSVORRICHTUNG

(57) Abstract: The invention relates to a clamping and/or brake device, comprising a base element (7) and an impinging element (17) via which the clamping and/or brake forces produced are transferred onto an object (39), and at least two adjacent walls (3) which impinge, with one terminal zone each, the base element (7) and the impinging element (17), whereby the walls (3) define a pressure chamber. The walls (3) are provided with respective flexible zones (3a), thereby forming a spring-type element between the base element (7) and the impinging element (17). In the pressureless state of installation, the impinging element (17) can be used to exert a defined force on the object (39). When the pressure chamber is impinged upon with a positive or negative pressure, thereby changing the bend of the flexible zone (3a), the forces are modified or the impinging element is displaced. The walls (3) can be rigidly linked with the impinging element (17) and/or with the base element (7).
